

Northwind Robotics - Company Overview

Northwind Robotics was founded in 2011 in Austin, Texas by Elena Vasquez and Tomas Lindgren. The company designs and manufactures industrial automation robots for warehouses and factories. As of the end of 2025, Northwind Robotics employs 840 people worldwide and reported annual revenue of 312 million dollars for fiscal year 2025.

The company motto is: Precision in Motion.

Northwind became profitable for the first time in 2016.

Products

The flagship product is the AtlasArm, a six-axis industrial robotic arm launched in 2014. The AtlasArm has a payload capacity of 35 kilograms and a list price of 48,000 dollars.

The second product line is the HermesAGV, an autonomous guided vehicle for warehouse logistics released in 2019.

The HermesAGV can tow up to 1,200 kilograms and operates for 14 hours on a single charge. In 2023 the company introduced OrionVision, a machine vision quality control system priced at 9,500 dollars per station.

Global Offices

Northwind Robotics is headquartered in Austin, Texas, where 520 employees work. The first international office opened in Munich, Germany in 2018 and now hosts 190 employees, focused on European sales and the HermesAGV assembly line. In 2021 the company opened an office in Osaka, Japan with 130 employees dedicated to Asia-Pacific distribution and joint research with Kansai University on soft robotics.

Human Resources Policies

All full-time employees receive 24 vacation days per year plus 10 public holidays. Parental leave is 16 weeks at full pay for all new parents. Employees may work remotely up to 3 days per week with manager approval. The annual learning budget is 2,500 dollars per employee. Performance reviews happen twice a year, in March and September. The head of Human Resources is Priya Raman.

Financial Highlights

In fiscal year 2025 Northwind Robotics reported revenue of 312 million dollars, up 22 percent from the prior year. Gross margin was 41 percent. The company invests 18 percent of revenue into research and development. Third quarter 2025 revenue alone was 87 million dollars, the strongest quarter in company history. The chief financial officer is Marcus Chen, who joined from Vertex Capital in 2020.

IT and Security Policies

Employee passwords must be rotated every 90 days and use a minimum of 14 characters. Access to production systems requires hardware security keys. All remote connections must go through the corporate VPN. Security incidents must be reported to the hotline at extension 4522 within one hour of discovery. The security team runs phishing simulations every quarter. The chief information security officer is Danielle Okafor, appointed in 2022.
